

European Research in Mathematics Education

Proceedings of the Fifth Congress of the
European Society for Research in
Mathematics Education

22 – 26 February 2007
Larnaca, Cyprus

Editors

Demetra Pitta-Pantazi & George Philippou

Editorial board

Ainley J., Arcavi A., Arzarello F., Bagni G. T., Bardini C., Barzel B., Biehler R., Bills L., Blomhoj M., Bosch M., Cabassut R., Carrillo J., Cesar M., Douek N., deAbreu G., Durand-Guerrier V., Ferrari P. L., Gagatsis A., García J., Gorgorio N., Hannula M., Hejny M., Hemmi K., Jablonka E., Jaworski, B., Kadjevic D., Kadunz G., Kaiser G., Krummheuer G., Kuzniak A., Kvasz L., Kynigos C., Leikin R., Lenfant A., Littler G. H., Ludwig M., Mammona-Downs J., Marchini C., Marchive A., Marriotti M., Maschietto M., Meehan M., Meletiou-Mavrotheris M., Morgan C., Op't Eynde P., Ottaviani M., Parzysz B., Pepin B., Perez D., Pratt D., Prediger S., Puig L., Robotti E., Rogers L., Santos L., Schöglmann W., Sriraman B., Straesser, R., Wedege T.

TABLE OF CONTENTS

INTRODUCTION	xvi
<i>Rudolf Straesser, Barbara Jaworski</i>	
PLENARIES	1
Plenary 1	
Balancing interest in Fundamental understanding with considerations of usefulness in mathematics education research	2
<i>Frank K. Lester</i>	
Plenary 2	
What constitutes good practice in teaching mathematics, a personal perspective	24
<i>Nad'a Stehlíková</i>	
Plenary 3	
Teachers, technologies and the structures of schooling	52
<i>Kenneth Ruthven</i>	
Plenary 4	
Digital technologies: A window on theoretical issues in mathematics education	68
<i>Michèle Artigue</i>	
WORKING GROUP 1. The role of images and metaphors in the learning and understanding mathematics	83
The role of images and metaphors in the learning and understanding mathematics (including embodied cognition)	84
<i>Bernard Parzysz, Gert Kadunz, Elisabetta Robotti, Leo Rogers</i>	
Exploring the effects of representations on the learning of statistics in Greek primary school	90
<i>Sofia Anastasiadou, Athanasios Gagatsis</i>	
Guess what is inside this box: Look at these opened boxes for clues	101
<i>Roberto Araya</i>	
The number line as metaphor of the number system: A case study of a primary school	111
<i>Maria Doritou, Eddie Gray</i>	
Ways of thinking about the uses of images in learning and teaching geometry: A more thorough investigation of the links between drawings and figures	121
<i>Sophie Gobert</i>	
Mathematical Writing	131
<i>Gert Kadunz</i>	
Students' and teachers' representations in problem solving	141
<i>Annita Monoyiou, Pandelitsa Papageorgiou, Athanasios Gagatsis</i>	
The role of the conceptual metaphor in the development of children's arithmetic	151
<i>Carol Murphy</i>	
The power and perils of metaphor in making internal connections in trigonometry and geometry	161
<i>Norma Presmeg</i>	

Contents

Metaphors and image schemata in concept formation and reasoning <i>Reinert A. Rinvold</i>	171
Teaching special relativity <i>Leo Rogers, Patrick J. Caines</i>	181
Metaphors and cognitive modes in the teaching-learning of mathematics <i>Jorge Soto-Andrade</i>	191
WORKING GROUP 2. Affect and mathematical thinking	201
Affect and mathematical thinking <i>Markku S. Hannula, Peter Op't Eynde, Wolfgang Schläglmann, Tine Wedege</i>	202
Evaluating the sensitivity of the refined mathematics-related beliefs questionnaire to nationality, gender and age <i>Paul Andrews, Jose Diego –Mantecón, Peter Op 't Eynde, Judy Sayers</i>	209
Students' motivation in mathematics and gender differences in grades 6 and 7 <i>Chryso Athanasiou, George Philippou</i>	219
Refining the mathematics-related beliefs questionnaire (MRBQ) <i>Jose Diego-Mantecón, Paul Andrews, Peter Op 't Eynde</i>	229
Mathematics teachers' desire to develop <i>Markku S. Hannula, Madis Lepik, Tiit Kaljas</i>	239
Mathematics is - favourite subject, boring or compulsory <i>Kirsti Hoskonen</i>	248
Students' beliefs and attitudes concerning mathematics and their effect on mathematical ability <i>Eleftherios Kapetanas, Theodosios Zachariades</i>	258
The notion of children's perspectives <i>Troels Lange</i>	268
Belief change as conceptual change <i>Peter Liljedahl, Katrin, Rolka, Betinna Rösken</i>	278
Changes in students' motivational beliefs and performance in a self-regulated mathematical problem-solving environment <i>Andri Marcou, Stephen Lerman</i>	288
About mathematical belief systems awareness <i>Manuela Moscucci</i>	298
Efficacy beliefs, problem posing, and mathematics achievement <i>Aristoklis A. Nicolaou, George N. Philippou</i>	308
Students' self regulation of emotions in mathematics learning <i>Peter Op 't Eynde, Erik De Corte, Inge Mercken</i>	318
The impact of recent metacognitive experiences on preservice teachers' self-representation in mathematics and its teaching <i>Areti Panaoura</i>	329
Is motivation analogous to cognition? <i>Marilena Pantziara, Demetra Pitta-Pantazi, George Philippou</i>	339
Identifying dimensions of students' view of mathematics <i>Bettina Rösken, Markku Hannula, Erkki Pehkonen, Raimo Kaasila, Anu Laine</i>	349
Student errors in task-solving processes <i>Wolfgang Schläglmann</i>	359

Contents

Influence of didactical games on pupils' attitudes towards mathematics and process of its teaching <i>Peter Vankúš</i>	369
Intrinsic and extrinsic motivation versus social and instrumental rationale for learning mathematics <i>Kjersti Wæge</i>	379
Potential for change of views in the mathematics classroom? <i>Tine Wedege, Jeppe Skott</i>	389
WORKING GROUP 3. Building structures in mathematical knowledge	399
Building structures in mathematical knowledge <i>Milan Hejný, Graham Littler</i>	400
Constructing Multiplication: Different strategies used by pupils <i>Joana Brocardo, Lurdes Serrazina, Isabel Rocha</i>	407
Students' thinking about fundamental real numbers properties <i>Eustathios Giannakoulis, Alkeos Souyoul, Theodossios Zachariades</i>	416
Schema $A \pm B = C$ as the basis of arithmetic structure <i>Milan Hejný, Jana Slezáková</i>	426
Recognising an algebraic structure <i>Maureen Hoch, Tommy Dreyfus</i>	436
Creating a mental image of dice blackjack game <i>Antonín Jančařík</i>	446
Classification, manipulation and communication: Work with pupils and student teachers <i>Darina Jirotková, Graham H. Littler</i>	456
Investigating the processing structures of students' inductive reasoning in mathematics <i>Eleni Papageorgiou, Constantinos Christou</i>	466
Empirical Hierarchy of pupils' attainment of measurement in early primary school years <i>Alexandra Petridou, Maria Pampaka, Constantia Hadjidemetriou</i>	476
How do students from primary school discover the regularity <i>Marta Pytlak</i>	486
Reflection on activity – effect relationships in solving word problems <i>Ana Isabel Roig, Salvador Llinares</i>	496
Children's perceptions on infinity: Could they be structured? <i>Mihaela Singer, Cristian Voica</i>	506
The role of spatial configurations in early numeracy problems <i>Fenna Van Nes, Jan de Lange</i>	516
Students' ability in solving line symmetry tasks <i>Xenia Xistouri</i>	526
WORKING GROUP 4. Argumentation and proof	536
Argumentation and proof <i>Maria Alessandra Mariotti, Kirsti Hemmi, Viviane Durrand Guerrier</i>	537
Indirect proof: An interpreting model <i>Samuele Antonini, Maria Alessandra Mariotti</i>	541
Mathematics learning and the development of general deductive reasoning <i>Michal Ayalon, Ruhama Even</i>	551

Contents

How to decide? Students' ways of determining the validity of mathematical statements <i>Orly Buchbinder, Orit Zaslavsky</i>	561
Cabri's role in the task of proving within the activity of building part of an axiomatic system <i>Leonor Camargo, Carmen Samper, Patricia Perry</i>	571
Some remarks on the theorem about the infinity of prime numbers <i>Ercole Castagnola, Roberto Tortora</i>	581
Proofs problems in elementary number theory: Analysis of trainee teachers' productions <i>Annalisa Cusi, Nicolina A. Malara</i>	591
Relationship between beginner teachers in mathematics and the mathematical concept of implication <i>Virginie Deloustal-Jorrand</i>	601
Using the Van Hiele theory to analyse the teaching of geometrical proof at grade 8 in Shanghai <i>Liping Ding, Keith Jones</i>	612
Analysis of conjectures and proofs produced when learning trigonometry <i>Jorge Fiallo, Angel Gutiérrez</i>	622
Analysis of the teacher's arguments used in the didactical management of a problem solving situation <i>Patrick Gibel</i>	633
Structural relationships between argumentation and proof in solving open problems in algebra <i>Bettina Pedemonte</i>	643
Mathematical proof: Teachers' beliefs and practices <i>Antonis Sergis</i>	653
The mental models theory of deductive reasoning: Implications for proof instruction <i>Andreas J. Stylianides, Gabriel J. Stylianides</i>	665
Reviewing textbook proofs in class: A struggle between proof structure, components and details <i>Stine Timmermann</i>	675
WORKING GROUP 5. Stochastic Thinking	685
Developing stochastic thinking <i>Rolf Biehler, Maria Meletiou, Maria Gabriella Ottaviani, Dave Pratt</i>	686
Understanding confidence intervals <i>Herman Callaert</i>	692
Conditional probability problems and contexts. The diagnostic test context <i>Marta Carles, M. Pedro Huerta</i>	702
A microworld to implant a germ of probability <i>Michele Cerulli, Augusto Chiocciariello, Enrica Lemut</i>	712
The impact of a typical classroom practice on students' statistical knowledge <i>Andreas Eichler</i>	722
The "same" problem in three presentation formats: Different percentages of success and thinking processes <i>M. Pedro Huerta, M^a Ángeles Lonjedo</i>	732
The relationship between local and global perspectives on randomness <i>Peter Johnston-Wilder, Dave Pratt</i>	742

Contents

Transparent urns and colored tinker – cubes for natural stochastics in primary school <i>Laura Martignon, Kathryn Laskey, Elke Kurz-Milcke</i>	752
Constructing stochastic simulations with a computer tool – Students’ competencies and difficulties <i>Carmen Maxara, Rolf Biehler</i>	762
A cross – national comparison of introductory statistics students’ prior knowledge of graphs <i>Maria Meletiou-Mavrotheris, Carl Lee</i>	772
Sample space and the structure of probability combinations in preschoolers <i>Zoi Nikiforidou, Jenny Pange</i>	782
Looking for randomness in tasks of prospective teachers <i>Efi Paparistodemou, Despina Potari, Demetra Pitta</i>	791
Making connections between the two perspectives on distribution <i>Theodosia Prodromou</i>	801
WORKING GROUP 6. Algebraic Thinking	811
Working on algebraic thinking <i>Luis Puig, Janet Ainley, Abraham Arcavi, Giorgio Bagni</i>	812
Research impacting on student learning: How construction tasks influenced learners’ thinking <i>Shafia Abdul-Rahman</i>	816
Elementary school students’ understanding and use of the equal sign <i>Vassiliki Alexandrou-Leonidou, George Philippou</i>	825
A contribution of ancient Chinese algebra: Simultaneous equations and counting rods <i>Giorgio T. Bagni</i>	835
Patterns and generalization: the influence of visual strategies <i>Ana Barbosa, Pedro Palhares, Isabel Vale</i>	844
Matrices as Peircean diagrams: A hypothetical learning trajectory <i>Willibald Dörfler</i>	852
Do you see what I see? Issues arising from a lesson on expressing generality <i>Helen Drury</i>	862
Signs used as algebraic tools – A case study <i>Astrid Fischer</i>	872
Problems of a linear kind: From Vallejo to Peacock <i>Bernardo Gómez</i>	882
Developmental assessment of algebraic performance <i>Constantia Hadjidemetriou, Maria Pampaka, Alexandra Petridou, Julian Williams, Lawrence Wo</i>	893
Integrating the learning of algebra with technology at the European level: Two examples in the ReMath project <i>Jean-Baptiste Lagrange, Giampaolo Chiappini</i>	903
Research and practice in algebra: Interwoven influences <i>John Mason</i>	913
Distinguishing approaches to solving true/false number sentences <i>Marta Molina, Encarnación Castro, John Mason</i>	924
Student difficulties in understanding the difference between algebraic expressions and the concept of linear equation <i>Irini Papaieronymou</i>	934

Contents

Teachers' practices with spreadsheets and the development of algebraic activity <i>Kirsty Wilson, Janet Ainley</i>	944
WORKING GROUP 7. Geometrical Thinking	954
From geometrical thinking to geometrical work <i>Alain Kuzniak, Athanasios Gagatsis, Matthias Ludwig, Carlo Marchini</i>	955
The use of everyday objects and situations in mathematics teaching: The symmetry case in French geometry teaching <i>Caroline Bulf</i>	962
Geometrical working space, a tool for comparison <i>Catherine Houdement</i>	972
Comparison of observation of new space and its objects by sighted and non-sighted pupils <i>Iveta Kohanová</i>	982
Assessing the attainment of analytic – descriptive geometrical thinking with new tools <i>George Kospentaris, Panagiotis Spyrou</i>	992
Horizon as epistemological obstacle to understanding infinity <i>Magdalena Krátká</i>	1002
Geometrical rigidity and the use of dragging in a dynamic geometry environment <i>Victor Larios-Osorio</i>	1012
The utilisation of video enriched microworlds based on dynamic geometry environments <i>Markus Mann, Matthias Ludwig</i>	1022
Geometrical tiles as a tools for revealing structures <i>Carlo Marchini, Paola Vighi</i>	1032
The process of composition and decomposition of geometric figures within the frame of dynamic transformations <i>Christos Markopoulos, Despina Potari, Eftychia Schini</i>	1042
Problem solving in geometry: The case of the illusion of proportionality <i>Modestina Modestou, Iliada Elia, Athanasios Gagatsis, Giorgos Spanoudes</i>	1052
Spatial abilities in relation to performance in geometry tasks <i>Georgia Panaoura, Athanasios Gagatsis, Charalambos Lemonides</i>	1062
Spatial ability as a predictor of students' performance in geometry <i>Marios Pittalis, Nicholas Mousoulides, Constantinos Christou</i>	1072
Computer geometry as mediator of mathematical concepts <i>Paola Vighi</i>	1082
WORKING GROUP 8. Language and Mathematics	1092
Multiple perspectives on language and mathematics: Introduction and post – script <i>Candia Morgan, Konstantinos Tatsis, Hana Moraová, Jarmila Novotná, Margarida César, Birgit Brandt, Elmar Cohors-Fresenborg, Christa Kaune</i>	1094
Driving spontaneous processes in mathematical tasks <i>Rossella Ascione, Maria Mellone</i>	1109
Communities of practice in online mathematics discussion boards: Unpicking threads <i>Jenni Back, Nick Pratt</i>	1119
Pupils' mathematical reasoning expressed through gesture and discourse: A case study from a sixth-grade lesson <i>Raymond Bjuland, Maria Luiza Cestari, Hans Erik Borgersen</i>	1129

Contents

How mathematical signs work in a class of students with special needs: Can the interpretation process become operative?	1140
<i>Isabelle Bloch</i>	
Analyzing the constructive function of natural language in classroom discussions	1150
<i>Paolo Boero, Valeria Consogno</i>	
Assessment in the mathematics classroom. Studies of interaction between teacher and pupil using a multimodal approach	1160
<i>Lisa Björklund Boistrup</i>	
Certainty and uncertainty as attitudes for students' participation in mathematical classroom interaction	1170
<i>Birgit Brandt</i>	
Modelling classroom discussions and categorizing discursive and metacognitive activities	1180
<i>Elmar Cohors-Fresenborg, Christa Kaune</i>	
The language of friendship: Developing sociomathematical norms in the secondary school classroom	1190
<i>Julie-Ann Edwards</i>	
The use of a semiotic model to interpret meanings for <i>multiplication</i> and <i>division</i>	1200
<i>Marie Therese Farrugia</i>	
“Why should I implement writing in my classes?” An empirical study on mathematical writing	1210
<i>Marei Fetzer</i>	
Issues in analysis of individual discourse concurrent with solving a mathematical problem	1220
<i>Boris Koichu</i>	
Authority relations in the acquisition of the mathematical register at home and at school	1230
<i>Tamsin Meaney</i>	
Idea generation during mathematical writing: Hard work or a process of discovery?	1240
<i>Morten Misfeldt</i>	
Students' mathematical interactions and teachers' reflections on their own interventions. Part 1: Epistemological analysis of students' mathematical communication	1250
<i>Marcus Nührenbörger, Heinz Steinbring</i>	
Students' mathematical interactions and teachers' reflections on their own interventions. Part 2: Analysis of the collegial reflection on students' mathematical communication	1260
<i>Marcus Nührenbörger, Heinz Steinbring</i>	
Children's talk about mathematics and mathematical talk	1270
<i>Päivi Perkkilä, Eila Aarnos</i>	
The influence of learners' limited language proficiency on communication obstacles in bilingual teaching/learning of mathematics	1280
<i>Jana Petrová, Jarmila Novotná</i>	
A question of audience, a matter of address	1290
<i>David Pimm, Ruth Beatty, Joan Moss</i>	
Selected problems in communication between the teacher and the pupil explored from the semiotic viewpoint	1300
<i>Filip Roubíček</i>	
Obstacles in mathematical discourse during researcher – student interaction	1301
<i>Jana Slezáková, Ewa Swoboda</i>	
Writing mathematics through dominant discourses: The case of a Greek school mathematics magazine	1311
<i>Anastasia G. Stamou, Anna Chronaki</i>	

Contents

Investigating the influence of social and sociomathematical norms in collaborative problem solving <i>Konstantinos Tatsis</i>	1321
WORKING GROUP 9. Tools and technologies in mathematical didactics	1331
Tools and technologies in mathematical didactics <i>Chronis Kynigos, Caroline Bardini, Bärbel Barzel, Michela Maschietto</i>	1332
Teacher's practices and degree of ICT integration <i>Teresa Assude</i>	1339
Integration of computer algebra in an open learning environment <i>Bärbel Barzel</i>	1349
Teaching analysis in dynamic geometry environments <i>Irene Biza, Dionissis Diakoumopoulos, Alkeos Souyoul</i>	1359
Online resources in mathematics: Teachers' genesis of use <i>Laetitia Bueno-Ravel, Ghislaine Gueudet</i>	1369
Strange 3D plots <i>Thierry Dana-Picard, Ivy Kidron, David Zeitoun</i>	1379
Tool use in a technology – Rich learning arrangement for the concept of function <i>Paul Drijvers, Michiel Doorman, Peter Boon, Sjef van Gisbergen, Koeno Gravemeijer</i>	1389
Analysis of teacher education in mathematics and ICT <i>Fabien Emprin</i>	1399
Developing tasks and teaching with ICT in mathematics in an inquiry community <i>Anne Berit Fuglestad</i>	1409
Technology that mediates and participates in mathematical cognition <i>Stephen Hegedus, Sara Dalton, Luis Moreno-Armella</i>	1419
Three dimensional constructions using an absolute frame of reference in a computer simulated 3D space <i>Chronis Kynigos, Efi Alexopoulou, Maria Latsi</i>	1429
Change in perception of prospective teachers regarding the image of the teacher as a result of engagement in a computerized environment <i>Ilana Lavy, Atara Shriki</i>	1439
Mathematics learning with the use of the balance, a computer programme from enciclomedia <i>María-Dolores Lozano, María Trigueros</i>	1449
Memorizing algebraic formulas: The support of a microworld <i>Laura Maffei, Maria Alessandra Mariotti</i>	1460
Flexibility and cooperation: Virtual learning environments in online undergraduate mathematics <i>Morten Misfeldt, Anders Sanne</i>	1470
Algebraic modelling using a dynamically linked geometry and computer algebra system <i>Reinhard Oldenburg</i>	1480
Cognitive styles, dynamic geometry and performance in area tasks <i>Demetra Pitta-Pantazi, Constantinos Christou</i>	1489
Meanings for fraction as number-measure by exploring the number line <i>Giorgos Psycharis, Maria Latsi, Chronis Kynigos</i>	1499
To sense and to visualize functions: The case of graph stretching <i>Geula Sever, Michal Yerushalmy</i>	1509

Contents

Tools that force reflection <i>Yianna Sirivianou, John Threlfall</i>	1519
Educational software based on the theory of constructivism <i>Mária Slavičková</i>	1531
Teaching with a symbolic calculator – The first years of a long-term project <i>Hans-Georg Weigand</i>	1540
WORKING GROUP 10. Mathematics education in multicultural settings	1550
Researching diversity in mathematics education <i>Margarida César, Guida de Abreu, Núria Gorgorió</i>	1551
Social representations and multicultural mathematics teaching and learning <i>Guida de Abreu, Núria Gorgorió</i>	1559
Landscapes of learning in a multicultural mathematics classroom <i>Helle Alrø, Ole Skovsmose, Paola Valero</i>	1567
Young children's number sense in China, England and Finland <i>Pirjo Aunio, Carol Aubrey, Ray Godfrey, Yan Liu, Pan Yuejuan</i>	1577
Filling the gap between global and local mathematics <i>Darlinda Moreira</i>	1587
Multiple identities in the mathematics classroom: A theoretical perspective <i>Diana Stenoft</i>	1597
Storying mathematical identities with cultural models <i>Julian Williams, Laura Black, Paul Hernandez-Martinez, Paulin Davis, Graeme Hutcheson, Su Nicholson, Maria Pampaka, Geoff Wake</i>	1607
WORKING GROUP 11. Different theoretical perspectives and approaches in research in mathematics education	1617
Different theoretical perspectives in research from teaching problems to research problems <i>Ferdinando Arzarello, Marianna Bosch, Agnès Lenfant, Susanne Prediger</i>	1618
Ostensives through the lenses of two theoretical frameworks <i>Ferdinando Arzarello, Ornella Robutti, Cristina Sabena</i>	1628
How do theories influence the research on teaching and learning limits of functions? <i>Christer Bergsten</i>	1638
Integrating research teams: The TELMA approach <i>Michele Cerulli, Jean Philippe Georget, Mirko Maracci, Giorgos Psycharis, Jana Trgalova</i>	1648
Construction of knowledge by primary pupils: The role of whole-class interaction <i>Thérèse Dooley</i>	1658
Emergence or structure: A comparison of two sociological perspectives on mathematics classroom practice <i>Uwe Gellert</i>	1668
An activity theory perspective of didacticians' learning within a mathematics teaching development research project <i>Simon Goodchild</i>	1678

Contents

Theory in developmental research in mathematics teaching and learning: Social practice theory and community of inquiry as analytical tools	1688
<i>Barbara Jaworski</i>	
On the nature of the mathematical knowledge under construction in the classroom	1698
<i>Maria Kaldrimidou, Haralambos Sakonidis, Marianna Tzekaki</i>	
Social interaction in learning processes as seen by three theoretical frameworks	1708
<i>Ivy Kidron, Agnès Lenfant, Angelika Bikner-Ahsbahs, Michèle Artigue, Tommy Dreyfus</i>	
Students' difficulties in vector spaces theory from two different theoretical perspectives	1725
<i>Mirko Maracci</i>	
Using mixed-methods methodology to investigate Cypriot preservice teachers' mathematics content knowledge	1735
<i>Marilena Petrou</i>	
From teaching problems to research problems. Proposing a way of comparing theoretical approaches	1745
<i>Susanne Prediger, Kenneth Ruthven</i>	
Towards a cultural theory of learning	1782
<i>Luis Radford</i>	
An anthropological approach to metacognition: The “study and research courses”	1798
<i>Esther Rodríguez, Marianna Bosch, Josep Gascón</i>	
Conditions and constraints in the teaching of statistics: The scale of levels of determination	1808
<i>Floriane Wozniak</i>	
WORKING GROUP 12. From a study of teaching practices to issues in teacher education	1819
From a study of teaching practices to issues in teacher education	1821
<i>José Carrillo, Leonor Santos, Liz Bills, Alain Marchive</i>	
Teachers' activity in exercises-based lessons. Some case studies	1827
<i>Maha Abboud-Blanchard, Claire Cazes, Fabrice Vandebrouck</i>	
Expressing generality: Focus on teachers' use of algebraic notation	1837
<i>Claire Vaugelade Berg</i>	
Striving to “know what is to be done”: The role of the teacher	1847
<i>Laurinda Brown, Alf Coles</i>	
“You don't need a tables book when you have butter beans!” Is there a need for mathematics pedagogy here?	1856
<i>Dolores Corcoran</i>	
Facilitate research activities at the primary level: Intentional communities of practice, teaching practices, exchanges about these practices	1866
<i>Jean-Philippe Georget</i>	
Adapting the hypothetical learning trajectory notion to secondary preservice teacher training	1876
<i>Pedro Gómez, María José González, Jose Luis Lupiáñez</i>	
Formative assessment: Tools for transforming school mathematics towards a dialogic practice?	1886
<i>Jeremy Hodgen</i>	
Developing strategies and materials impact on teacher education	1896
<i>Marie Hofmannová, Jarmila Novotná</i>	

Contents

Differences and similarities in (qualified) pedagogical reflection <i>Alena Hošpesová, Marie Tichá, Jana Macháčková</i>	1906
Pre-service teachers' representations of division of fractions <i>Mine Isiksal, Erdinc Cakiroglu</i>	1916
A task aimed at leading teachers to promoting a constructive early algebra approach <i>Nicolina A. Malara, Giancarlo Navarra</i>	1925
The professional development of a novice teacher in a collaborative context: An analysis of classroom practice <i>Maria Cinta Muñoz-Catalán, José Carrillo, Nuria Climent</i>	1935
From studies of cooperative learning practices towards a model of intervention on mathematics teachers <i>Angela Pesci</i>	1945
Teachers' mathematical knowledge and pedagogical practices in the teaching of derivative <i>Despina Potari, Theodosios Zachariades, Constantinos Christou, George Kyriazis, Demetra Pitta-Pantazi</i>	1955
Prospective primary teachers' use of mathematics teaching handbooks <i>Tim Rowland</i>	1965
The project work and the collaboration on the initial teacher training <i>Leonor Santos, Alexandra Bento</i>	1974
Primary teachers' attitudes towards and beliefs about mathematics teaching: the collective culture of one English primary school <i>Judy Sayers</i>	1984
The teaching modes: A conceptual framework for teacher education <i>Rosa Antónia Tomás Ferreira</i>	1994
The mathematics content knowledge of beginning teachers: The case of Amy <i>Fay Turner</i>	2004
Training mathematics teachers in a community of learners (COL) <i>Nellie C. Verhoef, Cees Terlouw</i>	2014
Exemplification in the mathematics classroom: What is it like and what does it imply? <i>Iris Zodik, Orit Zaslavsky</i>	2024
WORKING GROUP 13. Modelling and applications	2034
Modelling and applications – Differentiating perspectives and delineating commonalities <i>Gabriele Kaiser, Bharath Sriraman, Morten Blomhøj, Fco. Javier Garcia</i>	2035
Understanding of “modelling” <i>Mette Andresen</i>	2042
Using research and study courses for teaching mathematical modelling at university level <i>Berta Barquero, Marianna Bosch, Josep Gascón</i>	2050
The teaching calculus with applications experiment succeeded – Why and what else? <i>Abraham Berman, Igor M. Verner, Shuki Aroshas</i>	2060
Learning the integral concept through mathematical modelling <i>Morten Blomhøj, Tinne Hoff Kjeldsen</i>	2070
Personal experiences and extra-mathematical knowledge as an influence factor on modelling routes of pupils <i>Rita Borromeo Ferri</i>	2080
Making mathematical literacy a reality in classrooms <i>Hugh Burkhardt</i>	2090

Contents

Modelling bungee jumping: Why is it so difficult? <i>Ana Paula Canavarro</i>	2100
Mathematical modelling and parallel discussions <i>Jonei Cerqueira Barbosa</i>	2101
Comparison of mathematization in microcomputer based laboratory (MBL) and verification – Type laboratory (VTL) in physics <i>Murad Jurdak, Saouma BouJaoude, Norma Ghumrawi</i>	2110
Modelling tasks for low achieving students – First results of an empirical study <i>Katja Maaß</i>	2120
Tracing students’ modelling processes in elementary and secondary school <i>Nicholas Mousoulides, Bharath Sriraman, Marios Pittalis, Constantinos Christou</i>	2130
A meta-perspective on the nature of modelling and the role of mathematics <i>Irit Peled</i>	2140
The role of mathematical knowledge in a practical activity: Engineering projects at university level <i>Avenilde Romo Vázquez</i>	2150
Derivatives in applications: How to describe students’ understanding <i>Gerrit Roorda, Pauline Vos, Martin Goedhart</i>	2160
The functional algebraic modelling at Secondary level <i>Noemí Ruiz, Marianna Bosch, Josep Gascón</i>	2170
Mathematical modelling in school – Experiences from a project integrating school and university <i>Björn Schwarz, Gabriele Kaiser</i>	2180
Personal meaning in relation to modelling problems <i>Katrin Vorhölter</i>	2190
Interpreting velocity and stopping distance; complementarity, context and mathematics <i>Pauline Vos, Gerrit Roorda</i>	2200
Measuring perceived self-efficacy in applying mathematics <i>Geoff D. Wake, Maria Pampaka</i>	2210
WORKING GROUP 14. Advanced mathematical thinking	2220
Advanced mathematical thinking <i>Joanna Mamona-Downs</i>	2221
Lagrange’s theorem: What does the theorem mean? <i>Buma Abramovitz, Miryam Berezina, Abraham Berman, Ludmila Shvartsman</i>	2231
University students generating examples in real analysis: Where is the definition? <i>Samuele Antonini, Fulvia Furinghetti, Francesca Morselli, Elena Tosetto</i>	2241
Is there equality in equation? <i>Iris Attorps, Timo Tossavainen</i>	2250
Analysis of the autonomy required from mathematics students in the French lycee <i>Corine Castela</i>	2260
Local and global perspectives in problem solving <i>Martin Downs, Joanna Mamona-Downs</i>	2270
The application of the abductive system to different kinds of problems <i>Elisabetta Ferrando</i>	2280
University students’ difficulties with formal proving and attempts to overcome them <i>Justyna Hawro</i>	2290

Contents

The interplay between syntactic and semantic knowledge in proof production: Mathematicians' perspectives	2300
<i>Paola Iannone, Elena Nardi</i>	
Belief bias and the study of mathematics	2310
<i>Matthew Inglis, Adrian Simpson</i>	
Students' concept development of limits	2320
<i>Kristina Juter</i>	
Habits of mind associated with advanced mathematical thinking and solution spaces of mathematical tasks	2330
<i>Roza Leikin</i>	
Mathematical background and problem solving: How does knowledge influence mental dynamics in game theory problems?	2340
<i>Francesca Martignone</i>	
Student generated examples and the transition to advanced mathematical thinking	2349
<i>Maria Meehan</i>	
Understanding of systems of equations in linear algebra	2359
<i>Maria Trigueros</i>	
Students' choices between informal and formal reasoning in a task concerning differentiability	2369
<i>Antti Viholainen</i>	
Interplay between research and teaching from the perspective of mathematicians	2379
<i>Carl Winsløw, Lene Møller Madsen</i>
